Born: 6. May 2002 in Uralsk (Kazakhstan)

SHORT PROFILE

Proficient in Python and SQL for data analysis and automation. Skilled in Agile product development, A/B testing, and UX prototyping with Figma. Experienced in leveraging Jira, Tableau, and Confluence to drive technical product development.

EDUCATION

Oct 2023 - Present

B.Sc. in Management and Technology

Technical University of Munich (TUM), Germany

- Specialization in the field of Digital Technologies
- Key courses: Management Science, Machine Learning, Economics, Statistics, Introduction to Computer Science and Cost Accounting
- Achievements: Selected for TUMSelect, TUM's top student network.

WORK EXPERIENCE

Mar 2026 - Present

Program Manager Working Student

Amazon, Munich

- Conducting analytical and data-driven tasks to support product and marketing operations
- Assisting in planning and executing marketing campaigns, including digital content and merchant-facing materials

Aug 2025 - Feb 2026

Product Manager Intern

Amazon, Munich

- Built a RAG-based AI assistant from a 1,500+ file knowledge base, automating MBR/QBR drafting and reducing team metric retrieval time by 80%. (Received Learning & Development award within an 80+ person team.)
- Analyzed inbound defect patterns to prioritize 30 high-impact vendors, driving targeted resolution sprints that saved \$250,000 in Q4 logistics costs.
- Designed an automated KPI tracking system to surface the top 10 underperforming vendors weekly, enabling data-driven action plans that improved on-time delivery rates by 15% across flagged vendors.

May 2025 - Aug 2025

Student Assistant in the Department of Economics

Technical University of Munich (TUM), Heilbronn

- Conducted quantitative-empirical research using Python, including data cleaning and statistical analysis on student datasets.
- Developed SQL scripts to automate extraction and cleaning of raw student data, improving data accessibility for departmental faculty research.
- Leveraged LLM-based tools to accelerate literature review and qualitative data synthesis, reducing research preparation time by ~40%.

Aug 2024 - Jan 2025

Program Manager Working Student

Campus Founders, Heilbronn

- Executed market research via 150+ surveys and customer interviews to define user personas, pain points, and feature prioritization for future program cohorts.
- Developed a comprehensive PRD from scratch, documenting program modules, success metrics, and acceptance criteria to serve as the core knowledge base for the team.
- Synthesized qualitative feedback from 25+ user interviews to identify key pain points, driving feature improvements that increased program satisfaction by 25%

SKILLS

Programming & Data

Productivity & Office Tools

Design & Prototyping

Project & Product Management

AI & Automation Tools

Languages

- JavaScript, Python (NumPy, Matplotlib, Plotly), SQL (PostgreSQL), Tableau
- MS Office (Word, Excel, PowerPoint, Power BI) and Google Workspace (Google Docs, Sheets)
- Figma, Sketch, Axure, Framer, Miro, Adobe Photoshop, Adobe Express, Canva
- Jira, Confluence, Asana, Trello, Monday.com, Agile Frameworks, Notion, CMS
- Zapier, Claude Code, n8n, Amazon Quick Suite, Cursor AI, Gemini, ChatGPT
- German - A2, English - C1, Russian - Native, Kazakh - Native

PROJECTS

Oct 2025 - Mar 2026

Software Developer

CardioGuard - ML-powered heart disease risk prediction

- Built a Django web app using a Random Forest classifier and SHAP explainability to predict heart disease risk, featuring role-based dashboards and JWT-secured REST APIs.

Oct 2023 - Jan 2024

Product Marketing Manager

Innovote - Mobile app for promoting student clubs

- Interviewed 15+ staff and students to define personas and user journeys, directly informing the product roadmap.
- Designed a 20-page adaptive iOS app in Figma, featuring smooth animations and a consistent visual style.
